

CAN-AM

Congratulations. You now have the world's finest high density media storage cabinet. We are honored that you have chosen Can-Am cabinets to house your valuable collection of CDs and DVDs. Please be sure to follow all safety recommendations. Each cabinet is equipped with levelers. Please use them to level the base cabinet and lift it above your carpeting. And please stack media drawer cabinets no higher than nine drawers high. For added safety try to keep your cabinets locked as much as possible.

Divider & Backstop Assembly Instructions

Insert the bare end of the Divider Rod through the hole in the front of the Backstop and then into the hole at the rear of the drawer. Then force the rubber tipped end into the corresponding slot at the front of the drawer. Start at the left facing the cabinet and work your way to the right.

6 Rows for CDs / 4 Rows for DVDs

Thanks again for choosing Can-Am. Please let us know if your Can-Am experience was everything you hoped it would be or how we could serve you better.
