

### Pullout Cabinet Accessories For Narrow 23.5" Wide Cabinets

All Pullout Cabinets have a series of slots that accept our optional shelves and mini drawers. The sliders and shelf brackets snap into the slots and the shelves and drawers snap onto the brackets or sliders.

Whether you need a sturdy rollout shelf for electronics, a keyboard or laptop station, or simply an on-demand work surface or desk, the pullout shelf is it. A positive friction catch keeps shelves and mini drawers from rolling out accidentally.

### Shelves & Drawers Are Optional

This way you get to configure your cabinet anyway you like. Whatever you want, wherever you want it. You can mix and match shelves and drawers in the same cabinet. Levelers protrude through the bottom of all pullout cabinet floors and a shelf that creates a false floor is recommended. A stationary base shelf (ASHELF24) rests on the levelers and creates a false floor flush with the bottom lip of the cabinet. A pullout shelf or drawer will do the job as well.

**PUSHE24** - The PUSHE24 pullout shelf is designed to work in our narrow flip door cabinets. It makes wiring a breeze and is ideal for top loading electronics or turntables. Makes a great laptop station, too.

21" W by 2" H by 18" D ~ 9 lb

#### FEATURES

- Full extension heavy-duty sliders
- Position shelves anywhere
- Wire space between shelf and cabinet.

**ASHELF24** - Adjustable Stationary Shelf or Base Shelf. It only takes up 1" of height in your cabinet. As a base shelf, ASHELF24 rests on the levelers and creates a false floor that is flush with the bottom lip of the cabinet.

21" W by 1" H by 18" D ~ 7 lb

#### FEATURES

- Shelf brackets included
- Position shelves anywhere
- Wire space between shelf and cabinet.

**MINDW24** - Narrow Mini Drawers are designed to work in our narrow flip door cabinets. Just the right height for smaller items - but strong enough for whatever will fit. Full extension sliders mean you have access to every inch of space.

20.75" W by 1" H by 18" D ~ 7 lb

#### FEATURES

- Full extension heavy-duty sliders
- Position mini drawers anywhere
- Available in 18 colors

These narrow width cabinets use narrow shelves and drawers. Because there is no divider between the top and bottom halves of the F2D27X24 and F1D27X24, a pullout shelf, mini drawer, or stationary shelf is required.
